## Job Summary

Provides emergency medical care during in-hospital emergencies, inter-facility patient transports, and ambulance responses. Performs patient assessments, initiates interventions, and delivers advanced life support under established protocols. Practices in accordance with CBAHI Emergency Care standards and SCFHS scope of practice.

## Essential Duties & Responsibilities

1. Provides emergency medical care during Code Blue activations, rapid response calls, inter-facility patient transports, and ambulance responses. Delivers BLS and ALS interventions as per established protocols.
2. Performs patient assessments in emergency and transport settings including airway assessment, vital signs, cardiac monitoring, and neurological evaluation. Initiates appropriate interventions based on clinical findings.
3. Performs advanced skills including airway management, endotracheal intubation, IV access, intraosseous access, cardiac defibrillation, synchronized cardioversion, and medication administration as per protocol.
4. Operates and maintains emergency medical equipment including cardiac monitors/defibrillators, ventilators, suction devices, infusion pumps, and spinal immobilization devices.
5. Conducts daily ambulance readiness checks including equipment functionality, medication expiry dates, oxygen levels, and vehicle safety. Documents all checks as per CBAHI ER.15.5 standards.
6. Provides clinical handover to receiving teams during patient transfers, communicating patient condition, interventions performed, and response to treatment.
7. Documents all patient assessments, interventions, medications administered, and clinical outcomes accurately and in a timely manner using standardized documentation tools.
8. Participates in emergency drills, disaster exercises, and mass casualty simulations. Maintains readiness for deployment during internal and external emergencies.
9. Maintains current certifications in ACLS, PALS, BLS, and trauma life support. Participates in continuing education and competency assessments.
10. Adheres to infection prevention and control practices during patient care and transport. Ensures proper decontamination of equipment and ambulance after each patient contact.
11. Follows all hospital-related policies and procedures. Participates in self and others' education, training, and development. Performs other related duties as assigned.

## Qualifications: Education, Training & Experience

1. Education — Bachelor's Degree in Emergency Medical Services or Paramedicine is required. Associate Degree/Diploma in EMS is acceptable with additional experience.

2. Experience — 1 year of EMS/paramedic experience with Bachelor's or 3 years with Diploma is required. Hospital-based experience is preferred.
3. Licence / Certification — SCFHS licensure/classification as Emergency Medical Specialist/Paramedic is required. Current ACLS, BLS, and PALS certifications required. ATLS/ITLS preferred.

## Skills

1. Emergency Care: Assessment, triage, resuscitation and pre-hospital procedures.
2. Communication: Clear communication and handover with clinical teams.
3. Critical Thinking: Rapid prioritization and safe decision-making under pressure.
4. Teamwork: Effective collaboration within the emergency/response team.
5. Equipment Handling: Operation and readiness of emergency and life-support equipment.
6. Time Management: Managing time-critical workload and priorities.

## Knowledge

1. Pre-hospital and emergency patient assessment, triage and resuscitation.
2. BLS/ACLS/PALS/ATLS protocols and emergency procedural skills.
3. Emergency pharmacology, trauma management and patient transport/handover.
4. Knowledge of CBAHI National Hospital Standards and accreditation requirements.
5. Knowledge of GDIPC Infection Prevention & Control standards and hand-hygiene practice.
6. Knowledge of applicable KSA healthcare laws, regulations and the hospital Code of Conduct.

## Attitude & Behaviour

1. Respect & Integrity
2. Patient-Centred Approach
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Compassion & Empathy
10. Commitment to Safety

## Physical Requirements

- Prolonged standing and walking during shifts.
- Ability to lift/assist patients and equipment (up to ~20 kg) with safe technique.
- Manual dexterity for clinical/technical procedures.
- Use of personal protective equipment (PPE); potential exposure to clinical hazards.
- Shift work, night shifts and on-call duties as required by the unit.
