Senior Clinical Engineer

Clinical Engineering · Medical Services

Job title	Senior Clinical Engineer	**Job code**	JD-HRM-065
Department	Clinical Engineering	**Division**	Medical Services
Grade	AH3	**Reports to**	Clinical Engineering Manager / Facility Manager
Supervises	Clinical Engineers, Biomedical Technicians and trainees (as assigned)	**SCFHS licence**	Yes — Not required (engineering)

Job Summary

The Senior Clinical Engineer provides senior-level clinical engineering services at Almather Hospital, leading the planned preventive maintenance (PPM) programme, supervising junior clinical and biomedical engineering staff, and supporting medical-equipment planning, procurement evaluation and incident investigation, while ensuring compliance with CBAHI, MOH and departmental quality and safety standards.

Essential Duties & Responsibilities

1. Clinical Engineering Practice

i. Lead and oversee installation, inspection, calibration and repair of medical equipment, and manage the PPM schedule and its compliance.

ii. Oversee the medical-equipment inventory, service records and recalls register, and report on equipment performance and downtime.

iii. Lead device-related incident investigation and root-cause analysis, and provide technical input to capital planning and procurement evaluation.

iv. Ensure electrical safety and compliance with manufacturer and CBAHI standards; supervise, mentor and competency-assess junior engineers and biomedical technicians.

2. Quality, Patient Safety & Accreditation

i. Comply with CBAHI and MOH standards applicable to the role.

ii. Participate in quality improvement projects, audits, incident reporting and root-cause analysis.

iii. Report patient-safety events, near-misses and hazards through the approved reporting system.

3. Infection Prevention & Control

i. Adhere to hand-hygiene, standard and transmission-based precautions at all times.

ii. Comply with the hospital Infection Prevention & Control programme and GDIPC audit requirements.

4. Professional Conduct & Development

i. Maintain a valid SCFHS / SCHS professional registration where applicable.

ii. Complete mandatory training, competency assessments and continuing professional development.

iii. Uphold patient confidentiality, dignity, rights and the hospital Code of Conduct.

5. Additional Responsibilities

i. Perform additional duties or projects as assigned by the Clinical Engineering Manager / Facility Manager.

Qualifications: Education, Training & Experience

1. Education — Bachelor's degree or Diploma in the relevant allied-health discipline
2. Education (Preferred) — Postgraduate qualification or professional certification (e.g., CCE/CBET) in clinical engineering
3. Experience — 5+ years relevant clinical/biomedical engineering experience, including supervisory exposure
4. Licence / Registration — Valid SCFHS (SCHS) registration in the relevant allied-health category
5. Certification — Bachelor in Biomedical/Clinical Engineering; CBET or equivalent certification preferred.

Skills

1. Technical Skill: Discipline-specific technical and procedural competence.
2. Accuracy & Safety: Precision, quality control and safety in technical work.
3. Communication: Effective communication with clinical teams and patients.
4. Equipment Handling: Operation, calibration and maintenance of equipment.
5. Technology: Use of relevant information and laboratory/imaging systems.
6. Organisation: Workload prioritization and documentation.

Knowledge

1. Medical-equipment engineering, planned preventive maintenance and equipment lifecycle management.
2. Electrical safety, equipment testing and medical-device regulations (SFDA).
3. Incident investigation/RCA, capital and procurement evaluation, and supervision of biomedical staff.
4. Knowledge of CBAHI accreditation requirements relevant to the department.
5. Knowledge of applicable KSA laws, regulations and the hospital Code of Conduct.

Attitude & Behaviour

1. Respect & Integrity
2. Patient-Centred Approach
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Compassion & Empathy
10. Commitment to Safety

Physical Requirements

- Prolonged standing and walking during shifts.
- Ability to lift/assist patients and equipment (up to ~20 kg) with safe technique.
- Manual dexterity for clinical/technical procedures.
- Use of personal protective equipment (PPE); potential exposure to clinical hazards.
- Shift work, night shifts and on-call duties as required by the unit.

Approval

Reviewed & recommended by	Department Head	Approved by	HR Manager
