Infection Control Nurse Coordinator

Nursing · Nursing & Allied Health

Job title	Infection Control Nurse Coordinator	**Job code**	JD-HRM-084
Department	Nursing	**Division**	Nursing & Allied Health
Grade	N3	**Reports to**	Deputy Chief Nursing Officer / CNO
Supervises	None	**SCFHS licence**	Yes — Category 4 — Nurse

Job Summary

Coordinates the hospital-wide infection prevention and control (IPC) program ensuring compliance with CBAHI IPC standards, Saudi MOH regulations, and international best practices. Conducts HAI surveillance, leads outbreak investigations, delivers IPC education, and provides consultation to all departments to reduce infection risk for patients, staff, and visitors.

Essential Duties & Responsibilities

1. Coordinates and implements the hospital-wide infection prevention and control (IPC) program in compliance with CBAHI IPC standards, Saudi MOH regulations, and evidence-based guidelines. Develops the annual IPC plan and ensures its implementation.
2. Conducts continuous surveillance of healthcare-associated infections (HAIs) using standardized definitions and systematic data collection methods. Monitors epidemiologically important infections, processes, and devices associated with HAI risk.
3. Collects, analyzes, and reports HAI surveillance data including rate calculations, trend analysis, and benchmarking against national and international standards. Provides regular reports to the IPC Committee and Nursing Affairs leadership.
4. Ensures effective implementation of standard precautions and transmission-based isolation protocols across all patient care areas. Monitors compliance with hand hygiene, personal protective equipment use, and aseptic technique.
5. Coordinates the investigation and management of infectious disease outbreaks. Leads epidemiological investigations, implements control measures, and ensures results are used to prevent recurrence.
6. Develops, reviews, and updates IPC policies and procedures in collaboration with medical staff, nursing staff, and other relevant stakeholders. Ensures the IPC manual is accessible to all staff in all patient care areas.
7. Provides ongoing IPC consultation to all hospital departments. Conducts environmental rounds and monitors cleaning, decontamination, disinfection, and sterilization processes across the facility.
8. Coordinates the sharps safety program and monitors compliance with safe handling and disposal of sharps. Manages needle-stick injury reporting and post-exposure prophylaxis protocols.
9. Plans and delivers continuing education on IPC practices for staff, patients, families, and caregivers. Ensures new staff orientation includes IPC policies and procedures. Maintains training records.
10. Serves as the nursing representative on the multidisciplinary IPC Committee. Prepares reports for committee review and follows up on committee recommendations within nursing units.
11. Monitors staff health programs related to infection prevention including immunization compliance, blood/body fluid exposure management, and communicable disease protocols.
12. Provides IPC guidance during hospital renovations and construction activities to minimize infection risk. Reviews IPC implications for new equipment, products, and procedural changes.

Uncontrolled when printed. Verify the current version with the Quality Management Department.

13. Follows all hospital-related policies and procedures. Participates in self and others' education, training, and development. Performs other related duties as assigned.

Qualifications: Education, Training & Experience

1. Education — Bachelor's Degree in Nursing (BSN) is required. Master's Degree in Nursing, Infection Control, Epidemiology, or related discipline is preferred.
2. Experience — 4 years of clinical nursing experience with Master's or 6 years with Bachelor's is required. Minimum 2 years of experience in infection prevention and control is required.
3. Licence / Certification — Current RN licensure from country of origin and SCFHS licensure/classification required. CIC (Certification in Infection Control) or equivalent IPC certification preferred. BLS required.

Skills

1. Clinical Nursing: Competent nursing assessment, intervention and the nursing process.
2. Communication: Clear communication and patient/family education.
3. Critical Thinking: Prioritization, escalation and safe clinical decision-making.
4. Teamwork: Effective collaboration within the multidisciplinary team.
5. Technology: Use of HIS/EMR, monitoring and clinical devices.
6. Time Management: Managing workload and priorities under pressure.

Knowledge

1. Infection-prevention principles, HAI surveillance and outbreak investigation.
2. GDIPC standards, isolation precautions, sterilisation/disinfection and hand hygiene.
3. Antimicrobial-stewardship support and IPC audit/education.
4. Knowledge of CBAHI National Hospital Standards and accreditation requirements.
5. Knowledge of GDIPC Infection Prevention & Control standards and hand-hygiene practice.
6. Knowledge of applicable KSA healthcare laws, regulations and the hospital Code of Conduct.

Attitude & Behaviour

1. Respect & Integrity
2. Patient-Centred Approach
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Compassion & Empathy
10. Commitment to Safety

Physical Requirements

- Prolonged standing and walking during shifts.

- Ability to lift/assist patients and equipment (up to ~20 kg) with safe technique.
- Manual dexterity for clinical/technical procedures.
- Use of personal protective equipment (PPE); potential exposure to clinical hazards.
- Shift work, night shifts and on-call duties as required by the unit.
