CSSD Supervisor

Nursing · Nursing & Allied Health

Job title	CSSD Supervisor	**Job code**	JD-HRM-087
Department	Nursing	**Division**	Nursing & Allied Health
Grade	AH3	**Reports to**	Nursing Director
Supervises	CSSD Specialists and Technicians	**SCFHS licence**	Yes — Category 5 — Allied Health Professional

Job Summary

Supervises the Central Sterile Supply Department (CSSD) ensuring efficient and quality sterilization services in compliance with CBAHI IPC.18-22 standards. Manages staff, equipment, workflows, and quality assurance for all decontamination, disinfection, sterilization, and distribution of reprocessed instruments and supplies.

Essential Duties & Responsibilities

1. Supervises all CSSD operations including decontamination, cleaning, inspection, packaging, sterilization, storage, and distribution of instruments and supplies. Ensures unidirectional workflow from dirty to clean areas (CBAHI IPC.20).
2. Ensures compliance with CBAHI IPC.18-22 standards including policies for transportation, cleansing, decontamination, disinfection, sterilization, storage, and recall of sterile items approved by the IPC Committee.
3. Manages and monitors CSSD staff performance including Senior CSSD Specialists, CSSD Specialists, and CSSD Technicians. Conducts evaluations, schedules shifts, and coordinates continuing education and competency assessments (CBAHI IPC.19).
4. Ensures all sterilizers are in good working order with documented preventive maintenance records. Monitors sterilization parameters (time, temperature, pressure) and ensures chemical indicators are used in every package and biological indicators weekly (CBAHI IPC.21.5-21.7).
5. Oversees proper sterilization records including load lists, daily function tests, spore test results, lot numbers, and operator names. Ensures records are maintained for at least one year (CBAHI IPC.19.4).
6. Manages the single-use item reprocessing program ensuring compliance with hospital policy, manufacturer approval, IPC Committee approval, and biomedical engineering testing (CBAHI IPC.22).
7. Ensures adequate PPE availability and use in decontamination areas including heavy-duty gloves, waterproof aprons, facemasks, boots, and goggles/face shields (CBAHI IPC.21.1).
8. Develops, reviews, and updates CSSD policies and procedures in collaboration with the IPC team. Ensures policies are consistent with scientific guidelines and manufacturer instructions.
9. Manages the CSSD budget and inventory. Monitors cost efficiency, equipment lifecycle, and procurement of sterilization supplies and consumables.
10. Establishes and monitors departmental quality indicators including sterilization failure rates, turnaround times, instrument availability, and recall rates. Prepares reports for hospital leadership.
11. Coordinates with operating rooms, procedure areas, and clinical units to ensure timely availability of sterile instruments and supplies. Manages emergency/flash sterilization requests (CBAHI IPC.21.8).
12. Follows all hospital-related policies and procedures. Participates in self and others' education, training, and development. Performs other related duties as assigned.

Qualifications: Education, Training & Experience

1. Education — Bachelor's Degree in Health Sciences, Biomedical Technology, or related discipline is required. CSSD-specific certification/diploma is required.
2. Experience — 5 years of CSSD experience including 2 years in a supervisory role is required. Hospital central sterilization experience is required.
3. Licence / Certification — SCFHS registration as CSSD Technician/Specialist is required (CBAHI IPC.19.1). CRCST or CBSPD certification preferred.

Skills

1. Sterile Processing: Decontamination, assembly and sterilisation technique.
2. Quality Control: Sterilizer monitoring, indicator interpretation and load release.
3. Communication: Effective liaison with OR, nursing and IPC teams.
4. Equipment Handling: Operation, QC and troubleshooting of sterilisers/washer-disinfectors.
5. Technology: Use of instrument-tracking and sterilizer-record systems.
6. Organisation: Workflow, inventory and documentation management.

Knowledge

1. CSSD operations management, workflow (dirty-to-clean) and quality/validation oversight.
2. Sterilisation processes, monitoring/validation and load-release governance.
3. Instrument traceability, inventory, staffing and competency assessment.
4. Knowledge of CBAHI National Hospital Standards and accreditation requirements.
5. Knowledge of GDIPC Infection Prevention & Control standards and hand-hygiene practice.
6. Knowledge of applicable KSA healthcare laws, regulations and the hospital Code of Conduct.

Attitude & Behaviour

1. Respect & Integrity
2. Patient-Centred Approach
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Compassion & Empathy
10. Commitment to Safety

Physical Requirements

- Prolonged standing and walking during shifts.
- Ability to lift/assist patients and equipment (up to ~20 kg) with safe technique.
- Manual dexterity for clinical/technical procedures.
- Use of personal protective equipment (PPE); potential exposure to clinical hazards.

- Shift work, night shifts and on-call duties as required by the unit.

Approval

Reviewed & recommended by	Department Head	**Approved by**	HR Manager
