Supply Chain Specialist – P&C

Supply Chain Management · Administration & Operations

Job title	Supply Chain Specialist – P&C	**Job code**	JD-HRM-105
Department	Supply Chain Management	**Division**	Administration & Operations
Grade	EC2	**Reports to**	Supply Chain Supervisor – P&C
Supervises	None	**SCFHS licence**	No

Job Summary

The Supply Chain Specialist – P&C executes procurement and contracting activities across the full lifecycle for clinical, non-clinical, service and capital requirements. The Specialist works with requesting departments, end users, suppliers and relevant internal and external support functions to progress requirements from requisition and sourcing through evaluation, award, purchasing, contracting and post-award administration, in accordance with the Supply Chain Manual, DoA and applicable procedures.

Essential Duties & Responsibilities

1. Contract Management

i. Prepare and coordinate the review, negotiation and execution of supply, service, equipment and other procurement contracts, working with Legal, requesting departments, suppliers and other relevant parties as required.

ii. Maintain contract records and the contract register, including effective dates, expiry dates, renewal and notice periods, key obligations, securities, amendments and other required contractual information.

iii. Monitor contracts throughout their lifecycle and coordinate required actions relating to supplier obligations, amendments or variations, renewals, extensions, expiry, termination and close-out.

iv. Monitor supplier and contract performance with requesting departments/end users against contractual requirements, service levels and agreed deliverables, and follow up or escalate non-performance and other contractual issues.

v. Support the use of framework agreements and other approved contractual arrangements, ensuring applicable pricing, terms, limits and conditions are followed.

2. Purchasing & Sourcing

i. Review purchase requisitions for completeness, required approvals, specifications/scope of work, budget confirmation and other information required to commence procurement.

ii. Work directly with requesting departments and end users to clarify requirements and obtain the necessary specifications, scope of work and operational, clinical or technical input.

iii. Execute sourcing and purchasing activities for clinical, non-clinical, service and capital requirements, including RFQs, tenders, framework call-offs and other approved sourcing methods.

iv. Identify and engage eligible suppliers, obtain quotations or tender responses, coordinate supplier clarifications, perform commercial evaluations and negotiate pricing and commercial terms as appropriate.

v. Coordinate technical and clinical evaluations with end users and relevant specialists, and prepare evaluation documentation and procurement/award recommendations for review and approval.

vi. Support the relevant evaluation panels and approval process, including preparation of documentation, supplier clarifications and follow-up of required actions.

vii. Prepare purchase orders and other procurement documents and progress them through the required review and approval workflow.

3. Supplier, End-User & Cross-Functional Coordination

i. Act as a day-to-day P&C contact for assigned requesting departments/end users and suppliers, following procurement and contracting activities through to completion.

ii. Coordinate and follow up with all relevant internal and external parties required to complete assigned procurement and contracting activities, including Finance, Legal, clinical and technical teams, Quality, IT, Logistics & Inventory, suppliers and specialist advisors as applicable.

iii. Coordinate with requesting departments, clinical teams and Logistics & Inventory on product requirements, alternatives or substitutions, availability, lead times, backorders and urgent supply requirements.

iv. Coordinate procurement-related supplier activities for capital and major equipment purchases, including delivery, installation and commissioning requirements, with the requesting department, Clinical Engineering, Logistics & Inventory and other responsible functions.

4. Follow-up, Records & Reporting

i. Track procurement, purchase order and contract actions through completion; expedite urgent or delayed requirements; and coordinate resolution of supplier, pricing, delivery, invoice or contractual discrepancies.

ii. Maintain complete and accurate procurement, supplier, pricing, purchase order, contract and approval records in the approved ERP system, registers and document repositories.

iii. Ensure assigned procurement files contain the required quotations/tenders, evaluations, approvals, correspondence and supporting documentation to maintain a complete audit trail.

iv. Provide the Supervisor with accurate and timely information on procurement status, contract status, savings, supplier performance, delays, risks and matters requiring escalation.

v. Follow up outstanding actions with suppliers, end users and support functions and escalate delays, non-responses, exceptions or risks to the Supervisor when required.

vi. Perform other Procurement & Contracting activities reasonably required for the effective operation of the Unit, as assigned by the Supply Chain Supervisor – P&C.

Qualifications: Education, Training & Experience

1. Education — Bachelor's degree in Business, Supply Chain, or a related field.
2. Experience — 3-5 years of combined purchasing and contract administration experience; healthcare experience preferred.
3. Certification — Relevant professional certification in procurement, supply chain or contract management is an advantage.

Skills

1. Strong working knowledge of sourcing, tendering, purchasing, commercial contract administration, supplier management and healthcare procurement requirements.
2. Ability to manage multiple procurement and contracting activities simultaneously and follow them through to completion.
3. Proficiency with ERP purchasing and contract management systems.
4. Strong negotiation and vendor relationship skills.
5. Comfort communicating with clinical staff and vendors under time pressure.
6. Excellent written communication and attention to detail.

Knowledge

1. Procurement, sourcing, tendering, quotations and contract-management practices.

2. ERP procurement/purchasing systems, purchase orders and supplier documentation.
3. Healthcare supply chain, product standardization, Delegation of Authority and supplier management.
4. Knowledge of applicable KSA laws, regulations and the hospital Code of Conduct.
5. Knowledge of confidentiality, data-protection (PDPL) and information-governance obligations.

Attitude & Behaviour

1. Respect & Integrity
2. Employee-Focused Service
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Fairness & Impartiality
10. Commitment to Compliance

Physical Requirements

- Primarily office-based with prolonged computer and screen use.
- Occasional movement across stores, warehouse and hospital departments.
- Ability to work under pressure and meet deadlines.
