Supply Chain Specialist – Logistics

Supply Chain Management · Administration & Operations

Job title	Supply Chain Specialist – Logistics	**Job code**	JD-HRM-108
Department	Supply Chain Management	**Division**	Administration & Operations
Grade	EC2	**Reports to**	Supply Chain Supervisor – Logistics
Supervises	None	**SCFHS licence**	No

Job Summary

The Supply Chain Specialist – Logistics manages warehouse and inventory operations, coordinates internal and external transportation and delivery, and supports clinical product evaluation and standardization, ensuring supplies are received, stored, distributed, and clinically vetted accurately and efficiently.

Essential Duties & Responsibilities

1. Receiving, Storage & Distribution

i. Coordinate and perform receiving activities, including checking deliveries against purchase orders and delivery documentation and verifying quantities, condition and other required receiving information.

ii. Identify and follow up shortages, over-deliveries, damaged goods, incorrect items and documentation discrepancies with P&C, suppliers, requesting departments and other relevant parties.

iii. Ensure received goods are correctly recorded, labelled, segregated, put away and stored in the appropriate location and under required storage conditions.

iv. Coordinate picking, issuing and internal distribution of supplies to hospital departments, substores and other designated inventory locations.

v. Coordinate supplier returns, replacements and other logistics-related corrective actions and ensure the related inventory records are updated.

vi. Coordinate urgent supply and delivery requirements and escalate actual or potential supply continuity issues to the Supervisor.

2. Inventory Control & Replenishment

i. Monitor stock availability, consumption, minimum/maximum levels, reorder points, lead times and other inventory parameters, and identify replenishment requirements.

ii. Coordinate replenishment requirements with P&C, requesting departments/end users and the Supervisor to reduce stock-outs, excess inventory and avoidable urgent purchases.

iii. Maintain effective inventory control across the central store, designated substores and other inventory locations under the Unit's responsibility, ensuring stock movements are accurately recorded and traceable.

iv. Perform and coordinate cycle counts, periodic physical inventories and other stock verification activities, investigate variances and prepare required adjustments or corrective actions for review and approval.

v. Monitor expiry dates and shelf life and apply appropriate stock rotation practices, including FEFO/FIFO where applicable.

vi. Monitor slow-moving, obsolete and excess inventory and coordinate required follow-up with the Supervisor, P&C, Finance and requesting departments.

3. Substores & End-User Coordination

i. Monitor designated substores and point-of-use inventory under the Unit's responsibility for stock levels, storage conditions, stock rotation, record accuracy and compliance with inventory controls.

Uncontrolled when printed. Verify the current version with the Quality Management Department.

ii. Work directly with requesting departments/end users on consumption, replenishment requirements, stock availability, service issues, product feedback and other inventory-related matters.
iii. Follow up identified substore or departmental inventory issues and escalate recurring variances, poor stock practices or other control concerns to the Supervisor.
iv. Provide consumption, stock movement, availability and other inventory information to support procurement planning and product evaluation or standardization activities as required.

4. Expiry, Damage, Recall, Loss & Disposal

i. Identify and segregate expired, damaged, defective, recalled, returned or otherwise unusable stock and coordinate the required follow-up in accordance with approved procedures.
ii. Monitor product recalls and safety notices relevant to inventory, identify affected stock, immediately control or segregate it and coordinate required actions with the Supervisor, Quality, clinical departments, P&C and other relevant functions.
iii. Investigate inventory discrepancies, missing or unexplained stock and suspected losses, maintain supporting documentation and promptly escalate material or suspected theft issues to the Supervisor.
iv. Support approved stock adjustments, write-offs, returns and disposals and ensure the physical inventory and system records are appropriately updated.

5. Systems, Records & Reconciliation

i. Ensure receipts, issues, transfers, returns, adjustments, disposals and other inventory movements are accurately and promptly recorded in the approved ERP/inventory system.
ii. Maintain accurate inventory, location, batch/lot, expiry and other required inventory information where applicable.
iii. Maintain complete receiving, stock-count, adjustment, expiry, damage, return, disposal and other required logistics records and supporting documentation.
iv. Reconcile physical inventory with system records, investigate discrepancies and coordinate required corrections and approvals.
v. Coordinate with Finance on inventory reconciliations, adjustments, write-offs, disposals and supporting documentation as required.
vi. Support inventory and logistics audits, inspections and accreditation activities and follow up assigned corrective actions.

6. Cross-Functional & Supplier Coordination

i. Coordinate and follow up with all relevant internal and external parties required to complete assigned logistics and inventory activities, including P&C, Finance, requesting departments/end users, clinical and technical teams, Quality, Infection Control, Facilities, Security, suppliers and other support functions as applicable.
ii. Work closely with P&C on supplier deliveries, shortages, lead times, substitutions, returns, replacements and other matters affecting supply availability or supplier performance.
iii. Follow up outstanding logistics and inventory actions through completion and escalate delays, non-responses, exceptions or risks to the Supervisor when required.

7. Reporting & Operational Support

i. Prepare and maintain inventory, stock-count, expiry, damage, loss, stock-out, excess/obsolete stock, receiving and distribution reports and trackers as required.
ii. Provide the Supervisor with accurate and timely information on stock availability, inventory accuracy, supply risks, operational issues and matters requiring escalation.
iii. Identify practical opportunities to improve inventory accuracy, storage, replenishment, distribution and other logistics processes.
iv. Provide day-to-day guidance and operational support to the Supply Chain Associate – Logistics when required.
v. Perform other Logistics & Inventory activities reasonably required for the effective operation of the Unit, as assigned by the Supply Chain Supervisor – Logistics.

Qualifications: Education, Training & Experience

1. Education — Bachelor's degree in Supply Chain, Logistics, Healthcare Administration, or a related field.
2. Experience — 3–5 years of relevant experience in inventory management, warehousing, hospital materials management or logistics; healthcare or hospital supply chain experience preferred.
3. Certification — Relevant professional certification in logistics, inventory or supply chain management is an advantage.

Skills

1. Strong working knowledge of inventory control, receiving, warehousing, stock counting, replenishment and internal distribution practices.
2. Working knowledge of ERP or inventory management systems and inventory reporting.
3. Understanding of inventory traceability, stock rotation, expiry control, recalls, storage requirements and loss-prevention controls.
4. Ability to investigate inventory discrepancies, reconcile records and follow corrective actions through to completion.
5. Strong organizational, analytical and problem-solving skills.
6. Effective communication and coordination with clinical and administrative departments, suppliers and support functions.
7. Ability to manage multiple operational priorities and follow actions through to completion.
8. High attention to detail and reliability in inventory and documentation controls.

Knowledge

1. Receiving, warehousing, storage, distribution and stock-rotation (FEFO/FIFO) practices.
2. Inventory control, cycle counting, par-levels, and expiry/damage/recall management.
3. ERP/inventory systems, barcode/scanning, cold-chain and medical-supply handling.
4. Knowledge of applicable KSA laws, regulations and the hospital Code of Conduct.
5. Knowledge of confidentiality, data-protection (PDPL) and information-governance obligations.

Attitude & Behaviour

1. Respect & Integrity
2. Employee-Focused Service
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Fairness & Impartiality
10. Commitment to Compliance

Physical Requirements

- Primarily office-based with prolonged computer and screen use.
- Occasional movement across stores, warehouse and hospital departments.

- Ability to work under pressure and meet deadlines.
