Supply Chain Associate – Logistics

Supply Chain Management · Administration & Operations

Job title	Supply Chain Associate – Logistics	**Job code**	JD-HRM-109
Department	Supply Chain Management	**Division**	Administration & Operations
Grade	EC1	**Reports to**	Supply Chain Supervisor – Logistics
Supervises	None	**SCFHS licence**	No

Job Summary

The Supply Chain Associate – Logistics performs day-to-day receiving, storage, inventory, replenishment and internal delivery activities for non-pharmaceutical supplies. The role helps maintain accurate stock records, organized storage areas and timely supply to hospital departments, substores and other inventory locations.

Essential Duties & Responsibilities

1. Receiving, Storage & Stock Handling

i. Receive deliveries, check quantities and condition against the available delivery and purchase order information, and report any shortages, damage, incorrect items or other differences.
ii. Label, put away and store supplies in the correct locations and under the required storage conditions.
iii. Rotate stock and follow FEFO/FIFO requirements where applicable.
iv. Pick, pack and prepare supplies for issue and internal delivery.
v. Keep stores, shelves and inventory locations clean, organized, safe and properly labelled.

2. Replenishment & Internal Distribution

i. Replenish hospital departments, substores and other designated inventory locations based on approved stock levels and requests.
ii. Deliver supplies to the correct department or location and obtain confirmation of delivery where required.
iii. Check stock levels during replenishment and report low stock, unusual consumption or other supply concerns to the Specialist or Supervisor.
iv. Support urgent supply and delivery requirements when required.

3. Inventory Control & Stock Counts

i. Perform cycle counts, physical stock counts and other inventory checks as instructed.
ii. Compare physical stock with system records and report any differences to the Specialist or Supervisor.
iii. Check expiry dates and identify near-expiry, expired, damaged, defective or recalled items.
iv. Segregate items that should not be issued or used and report them promptly in accordance with approved procedures.
v. Support the control of returned, excess, obsolete or unusable stock and approved returns or disposal activities.
vi. Immediately report missing stock, unexplained inventory differences or suspected loss.

4. Systems & Records

i. Record receipts, issues, transfers, returns and other assigned inventory transactions accurately and promptly in the approved system.
ii. Maintain accurate stock, delivery and inventory records and supporting documents.
iii. Assist with checking and correcting inventory records when differences are identified.

5. Coordination & Support

Uncontrolled when printed. Verify the current version with the Quality Management Department.

i. Work with the Specialist, Supervisor, P&C, hospital departments/end users, suppliers and other support teams as required to complete assigned logistics and inventory activities.
ii. Respond to routine stock and delivery enquiries and provide accurate information on assigned activities.
iii. Follow up assigned actions through completion and promptly report delays, missing information or problems that cannot be resolved.
iv. Perform other Logistics & Inventory activities reasonably required for the effective operation of the Unit, as assigned by the Supply Chain Supervisor – Logistics.

Qualifications: Education, Training & Experience

1. Education — High school diploma or equivalent; additional coursework in logistics or inventory is an advantage.
2. Experience — 0–2 years of experience in warehouse, inventory, materials handling, logistics or a related role; fresh candidates with suitable skills may be considered. Healthcare experience is an advantage.
3. Certification — Valid driver's license if required for assigned duties.

Skills

1. Basic computer skills and ability to learn the Hospital's inventory/ERP system and scanning equipment.
2. Basic understanding of stock handling and rotation practices, or ability to learn them.
3. Ability to accurately count, check and record inventory.
4. Ability to follow storage, safety and inventory procedures.
5. Reliable, organized and careful with stock and records.
6. Able to follow instructions and complete assigned tasks on time.
7. Able to communicate clearly with colleagues, hospital departments and suppliers.
8. Willing to work across receiving, stores, inventory counting, replenishment and delivery activities as required.

Knowledge

1. Receiving, warehousing, storage, distribution and stock-rotation (FEFO/FIFO) practices.
2. Inventory control, cycle counting, par-levels, and expiry/damage/recall management.
3. ERP/inventory systems, barcode/scanning, cold-chain and medical-supply handling.
4. Knowledge of applicable KSA laws, regulations and the hospital Code of Conduct.
5. Knowledge of confidentiality, data-protection (PDPL) and information-governance obligations.

Attitude & Behaviour

1. Respect & Integrity
2. Employee-Focused Service
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Fairness & Impartiality
10. Commitment to Compliance

Physical Requirements

- Primarily office-based with prolonged computer and screen use.
- Occasional movement across stores, warehouse and hospital departments.
- Ability to work under pressure and meet deadlines.
