Radiation Safety Officer

Radiology / Radiation Safety · Medical Services

Job title	Radiation Safety Officer	**Job code**	JD-HRM-110
Department	Radiology / Radiation Safety	**Division**	Medical Services
Grade	AH3	**Reports to**	Radiation Safety Committee Chair / Chief Medical Officer
Supervises	None	**SCFHS licence**	Yes — Category 5 — Allied Health Professional

Job Summary

The Radiation Safety Officer leads the hospital Radiation Protection Programme at Almather Hospital, ensuring the safe use of ionizing radiation for patients, staff and the public — through dosimetry, radiation surveys, equipment quality assurance, licensing and regulatory compliance — in accordance with NRRC regulations, CBAHI, MOH and hospital policies.

Essential Duties & Responsibilities

1. Radiation Safety Practice

i. Develop, implement and maintain the Radiation Protection Programme, radiation-safety policies, procedures and the ALARA programme.

ii. Oversee personnel dosimetry (TLD/OSL badges), dose monitoring and investigation of dose-limit exceedances, and maintain exposure records.

iii. Conduct radiation and contamination surveys, shielding assessment, leak tests and equipment acceptance/QA testing with calibrated instruments.

iv. Manage radioactive-source and equipment inventory, NRRC licensing/authorization, inspections, regulatory reporting, radiation-safety training and incident investigation; and support the Radiation Safety Committee.

2. Quality, Patient Safety & Accreditation

i. Comply with CBAHI and MOH standards applicable to the role.

ii. Participate in quality improvement projects, audits, incident reporting and root-cause analysis.

iii. Report patient-safety events, near-misses and hazards through the approved reporting system.

3. Infection Prevention & Control

i. Adhere to hand-hygiene, standard and transmission-based precautions at all times.

ii. Comply with the hospital Infection Prevention & Control programme and GDIPC audit requirements.

4. Professional Conduct & Development

i. Maintain a valid SCFHS / SCHS professional registration where applicable.

ii. Complete mandatory training, competency assessments and continuing professional development.

iii. Uphold patient confidentiality, dignity, rights and the hospital Code of Conduct.

5. Additional Responsibilities

i. Perform additional duties or projects as assigned by the Radiation Safety Committee Chair / Chief Medical Officer.

Qualifications: Education, Training & Experience

1. Education — Bachelor's degree in Medical Physics, Nuclear/Radiologic Sciences, Physics or a related field
2. Education (Preferred) — Master's degree in Medical/Health Physics or Radiation Protection preferred
3. Experience — 3–5 years in radiation protection, medical physics or radiation safety
4. Licence / Registration — Valid SCFHS (SCHS) registration where applicable; NRRC Radiation Safety Officer authorization required
5. Certification — Radiation Safety Officer (RSO) certification/qualification required; BLS preferred.

Skills

1. Radiation Protection: Dosimetry, ALARA, surveys and shielding assessment.
2. Regulatory Compliance: NRRC licensing, inspections and regulatory reporting.
3. Communication: Effective communication with clinical teams and patients.
4. Instrumentation: Operation and calibration of survey meters and dosimetry equipment.
5. Technology: Use of dose-record, imaging QA and radiation-safety information systems.
6. Organisation: Workload prioritization and documentation.

Knowledge

1. Radiation physics, radiobiology and radiation-protection principles (ALARA, dose limits).
2. NRRC regulations, licensing/authorization and radioactive-material/source control.
3. Dosimetry, radiation surveys, shielding, equipment QA and radiation-emergency response.
4. Knowledge of CBAHI National Hospital Standards and accreditation requirements.
5. Knowledge of applicable KSA healthcare laws, regulations and the hospital Code of Conduct.

Attitude & Behaviour

1. Respect & Integrity
2. Patient-Centred Approach
3. Accountability
4. Continuous Learning
5. Teamwork & Collaboration
6. Confidentiality
7. Professionalism
8. Adaptability & Resilience
9. Compassion & Empathy
10. Commitment to Safety

Physical Requirements

- Prolonged standing and walking during shifts.
- Ability to lift/assist patients and equipment (up to ~20 kg) with safe technique.
- Manual dexterity for clinical/technical procedures.
- Use of personal protective equipment (PPE); potential exposure to clinical hazards.

- Shift work, night shifts and on-call duties as required by the unit.

Approval

Reviewed & recommended by	Department Head	**Approved by**	HR Manager

Staff acknowledgement and signature are recorded electronically through the AMH Staff Credentials Portal.
